

ONLINE SECURITY PRACTICES FOR
THE CLEAN DIVORCE

PROTECTING YOUR DIGITAL WORLD

Use strong passwords

Creating strong and unique passwords at least 12 characters long, combining letters, numbers, and symbols, is essential for protecting your personal information.

Software Updates

Regularly update operating systems and applications to protect against vulnerabilities. Always log out of devices and applications after use, especially on shared or public computers. .

Social Engineering

Be cautious of unexpected requests for information or actions, especially from unfamiliar sources. Report any unusual interactions to IT or security personnel immediately.

Enable two-factor authentication

Two-factor authentication adds an extra layer of security to your online accounts by requiring an additional verification step.

Limiting Information Sharing

Be mindful of the information you share online, and avoid posting sensitive personal or financial information on social media or other public platforms.

Be cautious of phishing scams

Phishing scams are attempts to trick you into giving away your personal information. Watch for suspicious links, requests for personal information, or urgent demands.
